INDUSTRIAL DISPUTES, SEPTEMBER QUARTER 1970

This bulletin contains statistics of industrial disputes for the quarter ended 30 September 1970.

The statistics of industrial disputes refer only to disputes involving a stoppage of work of ten man-days or more. Workers indirectly involved are employees thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute.

The statistics of industrial disputes are compiled from data obtained from the following sources - (a) direct collections from employers and trade unions concerning individual disputes; (b) reports from government departments and authorities; (c) reports of State and Commonwealth industrial authorities; and (d) information contained in trade journals, employer and trade union publications, and newspaper reports. Particulars of some stoppages (e.g. those involving a large number of establishments) may be estimated and the statistics therefore should be regarded as giving a broad measure of the extent of stoppages of work (as defined).

An industrial dispute occurring in more than one State is counted as a separate dispute in each State. A dispute involving workers in more than one industry group in a State or Territory is counted once only in the number of disputes - in the industry group that has the largest number of workers involved; but workers involved, working days lost and estimated loss in wages are allocated to their respective industry groups. Disputes not settled at the end of a year are included as new disputes in the figures for the following year. Disputes not settled at the end of a quarter are not counted in the number of disputes for the following quarter, but additional workers involved and working days and wages lost are included.

For further information about statistics of industrial disputes see Labour Report No. 53, 1967.

TABLE 1. - INDUSTRIAL DISPUTES : AUSTRALIA

Period	Number	Workers involved ('000)			Working days lost		Estimated loss in wages (\$'000)
		Directly	Indirectly	Total	Number ('000)	Average days per worker involved	
1965	1,346	460.2	14.8	475.0	815.9	1.72	8,198
1966	1,273	385.0	9.9	394.9	732.1	1.85	7,302
